DETAILED ACTION

Election/Restrictions

1. Claims 1, 2, 4, 5, 9, 10, 13-16 and 19 are allowable. The restriction requirement among species, as set forth in the Office action mailed on 4/9/2007, has been reconsidered in view of the allowability of claims to the elected invention pursuant to MPEP § 821.04(a). **The restriction requirement is hereby withdrawn as to any claim that requires all the limitations of an allowable claim.** Claims 3, 6, 7, 8, 11, 12, 17, 18 and 21, directed to non-elected species are no longer withdrawn from consideration because the claim(s) requires all the limitations of an allowable claim. However, claim 20, remains withdrawn from consideration because it does not require all the limitations of an allowable claim.

In view of the above noted withdrawal of the restriction requirement, applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR

1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Cancel claim 20

Allowable Subject Matter

3. Claims 1-19 and 21 are allowed.

4. The following is an examiner's statement of reasons for allowance: Claims 1-19 and 21 are allowable since certain key features of the claimed invention are not taught or fairly suggested by the prior art. In claim 1, "a first voltage applied to the first end and a second voltage applied to the second end that is different from the first voltage; and wherein each one of a plurality of positions on the resistive element connects to a respective one of the rows or columns such that each of the different positions along the resistive element supplies a different voltage to the respective row or column than a remainder of the positions". In claim 13, "providing the first end with a first voltage and the second end with a second voltage that is different from the first voltage to generate a voltage in each of the columns that is different from a voltage in a remainder of the columns". In claim 19, "a resistive element means for reducing a voltage from a first end of the resistive element to a second end of the resistive element; and a first voltage means for driving the first end at a first voltage and a second voltage means for driving the second end at a second voltage that is different from the first voltage; wherein each one of a plurality of positions on the resistive element means connects to a respective one of the rows or columns such that each of the different positions along the resistive element means supplies a respective one of the columns with a different voltage than a remainder of the positions". The closest prior art of record however singularly or in combination fails to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to RICARDO L. OSORIO whose telephone number is (571) 272-7676. The examiner can normally be reached on MONDAY-THURSDAY 7:00 am-5:30 PM.
